

Under the rainbow capture' through an indigenous lens and ancient practice

What is the Rainbow Capture Credit holist lens mean.

R – Respect country to Restore and Regenerate

A – Action, means Abatement and how we Account for our Actions

I – Initiate our practices that Include old but new ways to Innovate.

N – Nurture, Nature that provides for us.

B – Biodiversity needs caring for to provide Benefits to us all and our future

O – Ownership and Opportunity of our survival that will ensure we have good Oxygen

W – World, is no good without healthy Water ways and we can't achieve this without the holistic lens.

So, what is Rainbow Capture? It is the amalgamation of Indigenous land management knowledge, values, and philosophies into the deteriorating global environment, and the emergence of carbon abatement, environmental offsets, Nature Repair /Ecosystem Services and conservation land management.

Agricultural practices over the past century have mined soils of their carbon stores and is one of the primary causes of land and water degradation and the loss of biodiversity in Australia. A wholistic approach founded on indigenous cultural land management practices that involves changes in cattle, land and water management will help mitigate climate change by rebuilding soil organic matter, restoring biodiversity and improving the water holding capacity of the soil.
