

Friday June 10, 9:00-10:15h

	Coreon: The possible consequences of the European Health Data Space for epidemiological research	Diabetes and Obesity	Genetic and Molecular Epidemiology	Reproductive Epidemiology
Room	Auditorium	Waalbrug A	Waalbrug B	Waalbrug C
Chairs	Evert-Ben van Veen	Renée de Mutsert & Frits van Osch	Jim Peters & Matty Weijnenberg	Nel Roeleveld & Nhung Trinh
9:00		Clinicians' perspectives on barriers and facilitators for the adoption of non-invasive liver tests: a mixed-method study (O36) <i>Yasaman Vali</i>	Genome-wide association study in patients with posterior urethral valves (O41) <i>Loes van der Zanden</i>	Maternal phthalate and bisphenol urine concentrations during pregnancy and early markers of vascular health in children (O46) <i>Sophie Blaauwendraad</i>
9:15		Development of a Neighbourhood Obesogenic Built Environment CharacterisTics (OBCT) index for the Netherlands (O37) <i>Thao Lam</i>	The effects of genetic susceptibility and stress-related exposures on depression and anxiety (O42) <i>Rujia Wang*</i>	Kidney injury rates among children with solitary functioning kidney in a Dutch long-term follow-up study (O47) <i>Sander Groen in 't Woud</i>
9:30		Tuberculosis risk among people with diabetes mellitus in Sub-Saharan Africa: a systematic review (O38) <i>Ilja Obels**</i>	Hemoglobin, red blood cell count, platelet count and blood pressure: observational and mendelian randomization analyses (O43) <i>Zhen He</i>	Registration of congenital anomalies in the Netherlands: Agreement between a national perinatal registry (Perined) and EUROCAT, the Dutch branch of population-based registries of congenital anomalies (O48) <i>Audrey Meulendijks</i>
9:45		Dairy product consumption in relation to incident prediabetes and longitudinal insulin resistance in the Rotterdam Study (O39) <i>Isabel Slurink</i>	Linear regression on martingale residuals enables fast and accurate recurrent event analysis for genome-wide association studies (O44) <i>Jasper Hof</i>	Spontaneous clearance of asymptomatic anogenital and pharyngeal Neisseria gonorrhoeae: Results from the NABOGO trial (O49) <i>Buhari Teker**</i>
10:00		Acute and long-term mortality rates among participants of mass-participation sport events (O40) <i>Esmée Bakker</i>	Atlas of metabolites and biochemical pathways associated with hepatic triglyceride content in middle aged men and women (O45) <i>Tariq Faquih</i>	Trajectories of maternal depressive symptoms during pregnancy and infant wheezing up to two years of age: a prospective cohort study (O50) <i>Marleen van Gelder*</i>

*Nominated for the VvE Oral Presentation Award

**Nominated for the VvE Student Award
