

FARMS/AOS Migration to ACRO

User Days, 7th /8th September 2023

T Systems Let's power
higher performance

**This presentation contains confidential information and is distributed on the understanding that it will not be used, in whole or in part, in any form or made available to any third party, except for participants of the User Conference and employees of the respective airport companies.*

Agenda

01 Introduction

02 Migration Planning

03 Example

A large white airplane is parked at an airport gate at night. The aircraft is illuminated by bright ground lights. A catering truck with the text "JAL ROYAL CATERING" and "202" is positioned near the rear of the plane. Ground service equipment, including a mobile staircases and a belt loader, is connected to the aircraft. The tarmac is visible in the background, with various lights and markings.

FARMS/AOS Migration to ACRO

Introduction

Business Goals

Customer

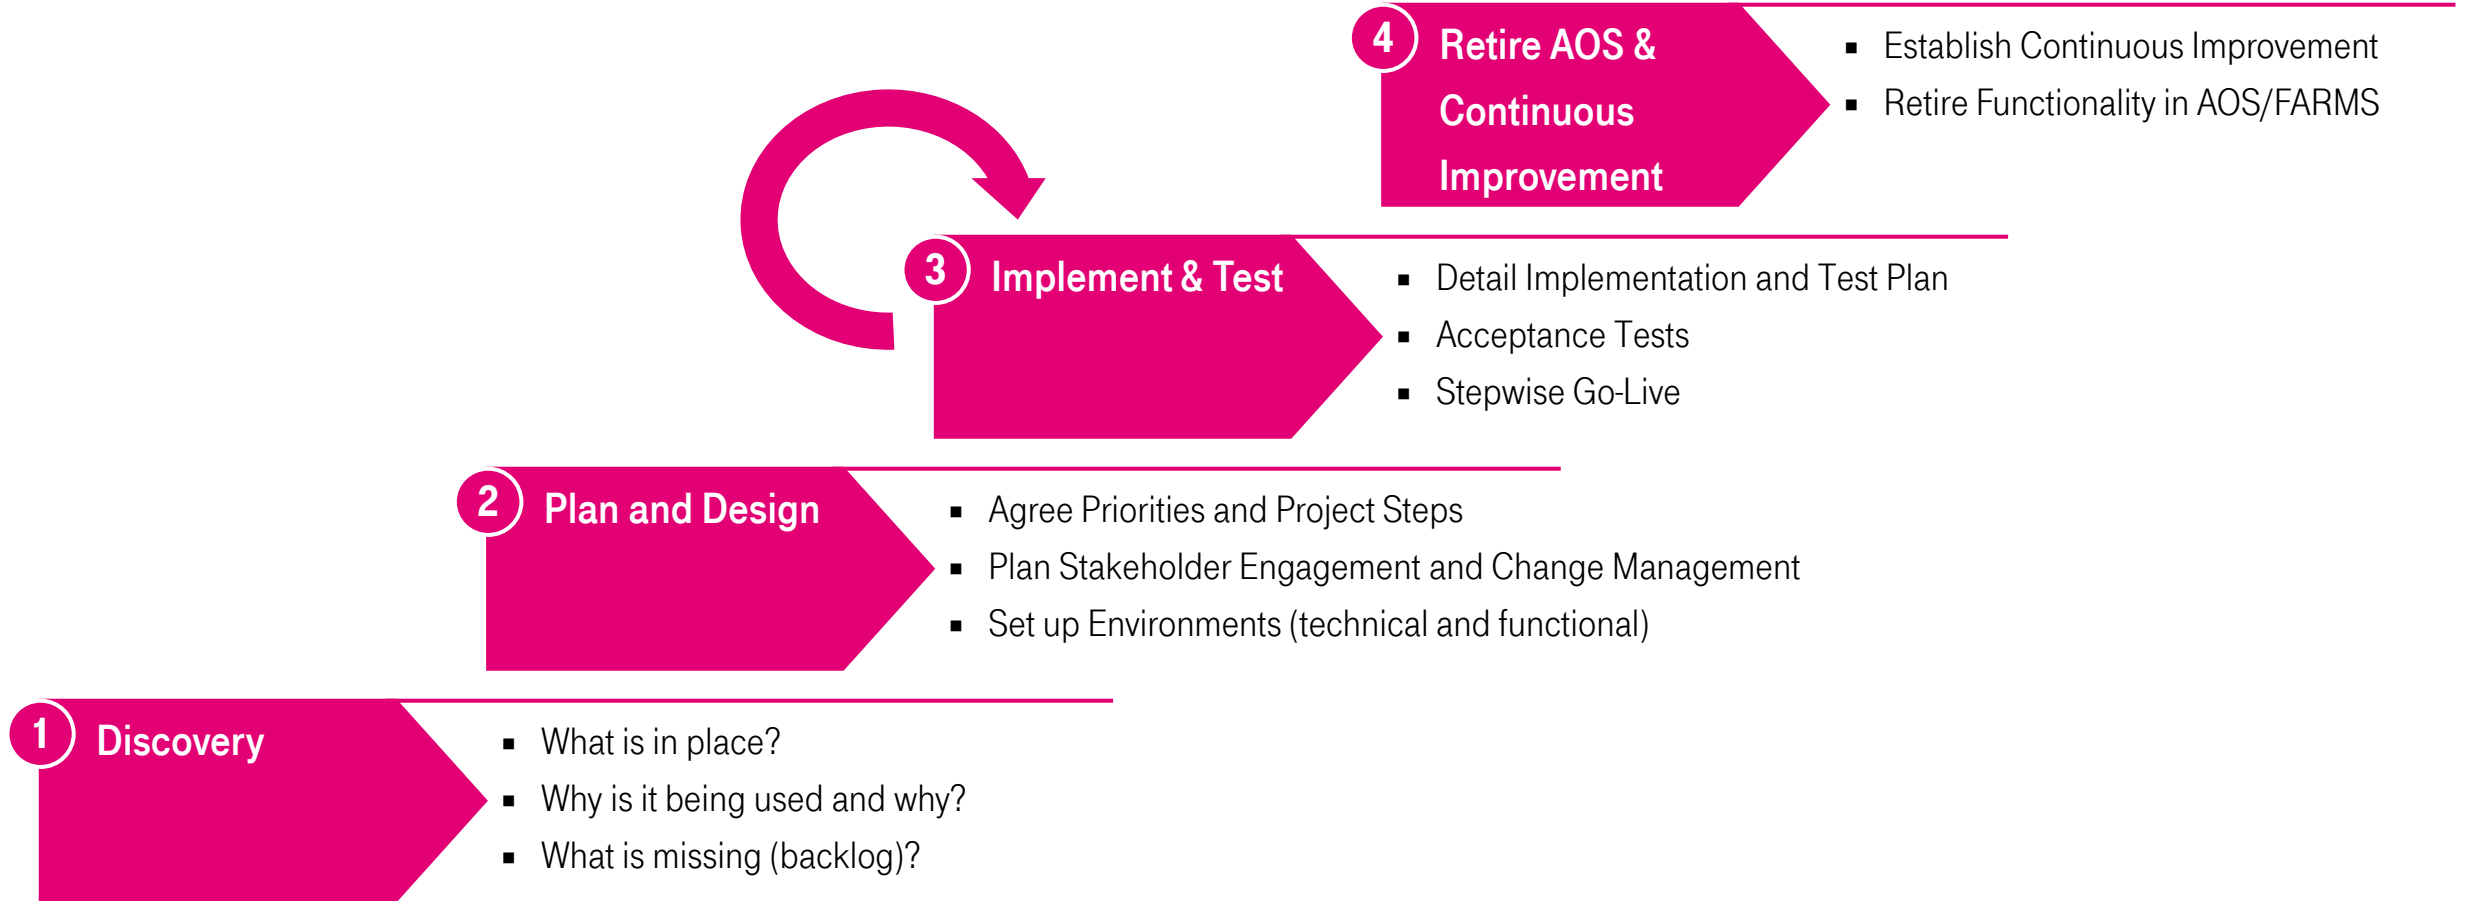

- Deliver a **flexible** and **future-proof airport system suite**
- Build a **digital twin** of the airport providing a **single source of truth** for **all processes** (aviation and non-aviation)
- Provide a **standard product** that can be **configured** to fit the customer processes e. g. by allowing **rule-based configuration** of flight **milestones**, **turnaround process steps** and **resource allocations**
- Reduce **time to users** and **increase speed of innovation**
- Establish a **migration path** for existing **AOS** and **FARMS** – remaining the **trusted** and **reliable partner**

FARMS/AOS Migration to ACRO

Migration Planning

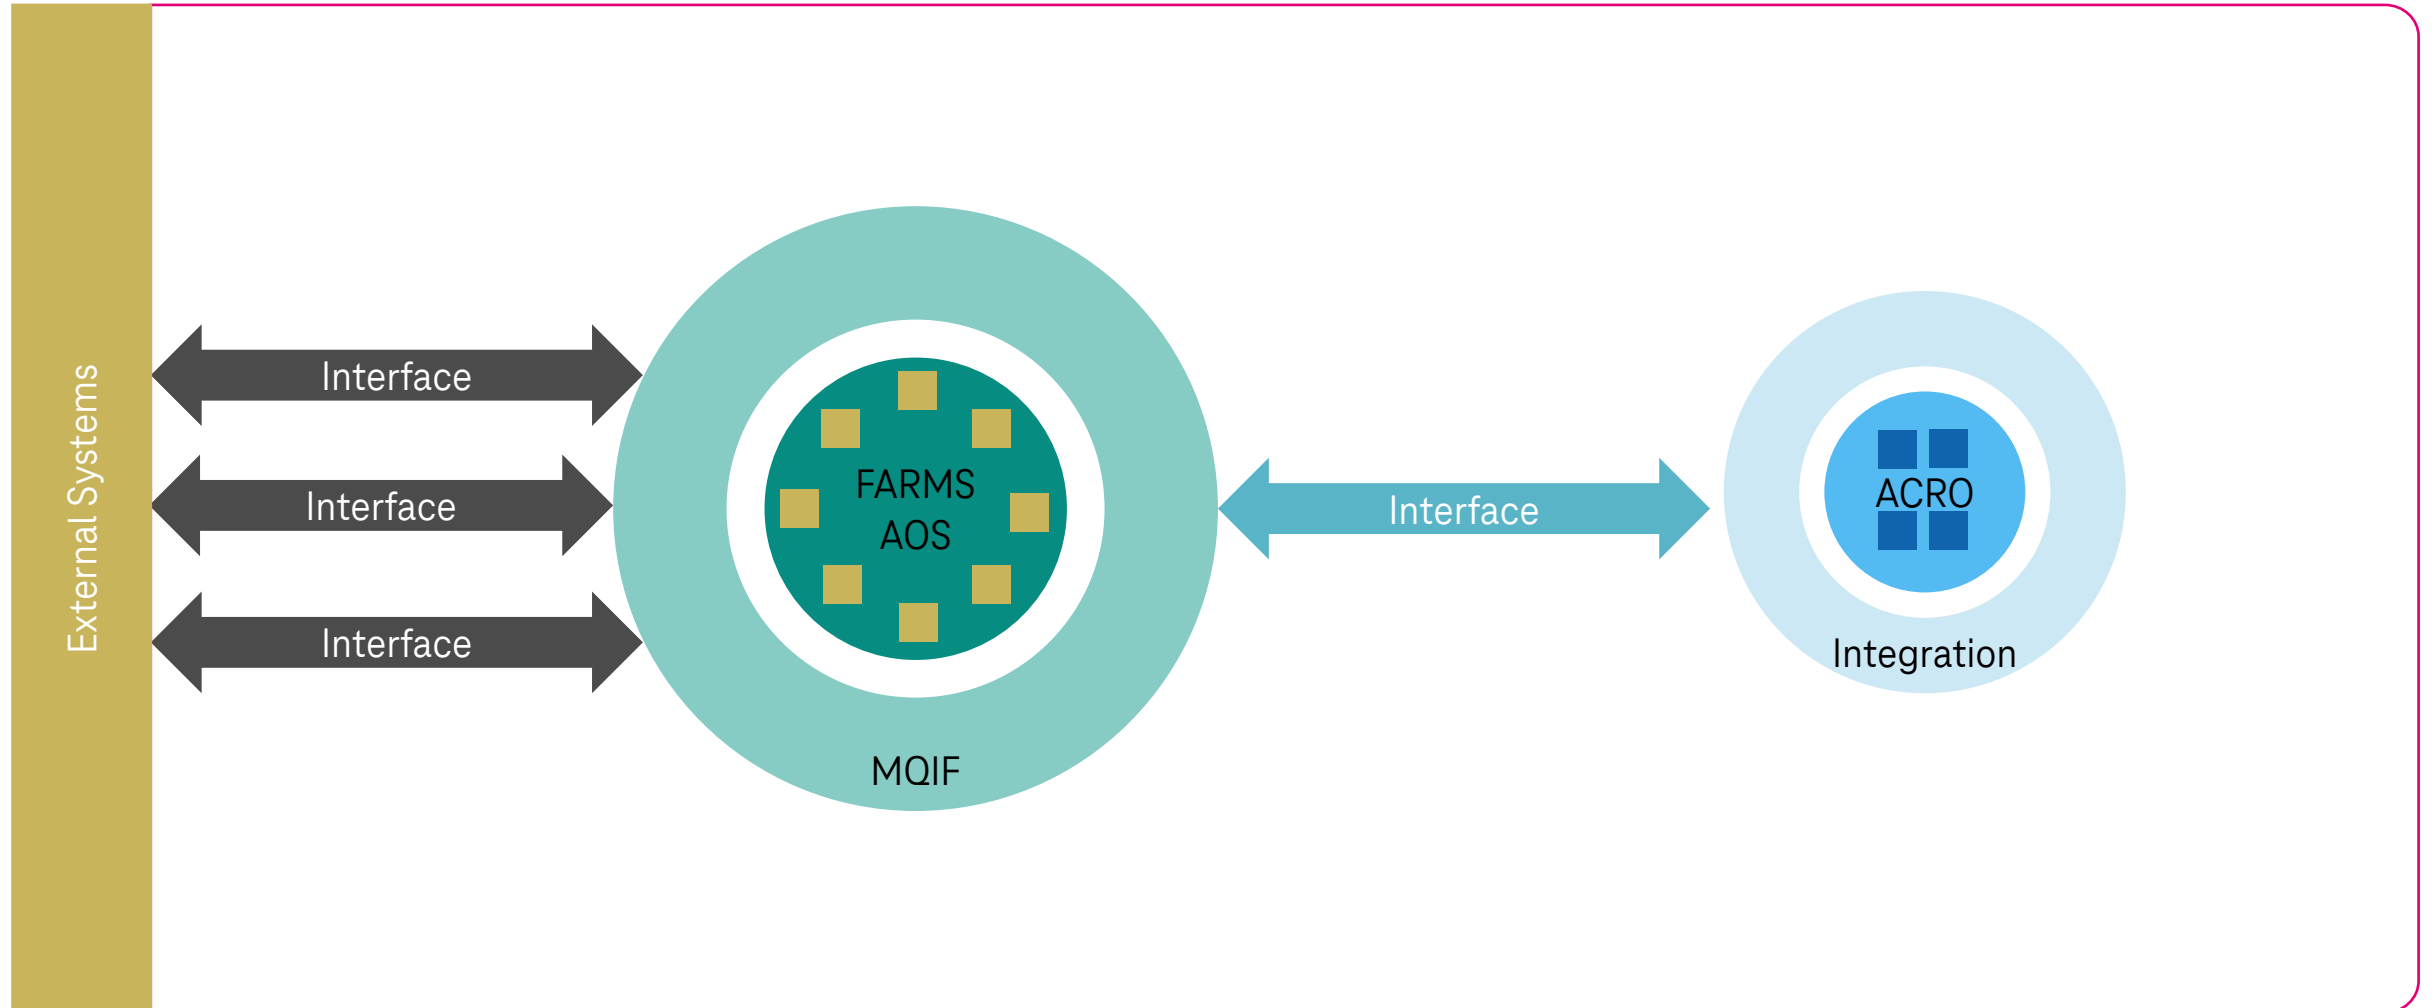

Plan Migration Steps as needed

Align steps with all stakeholder groups

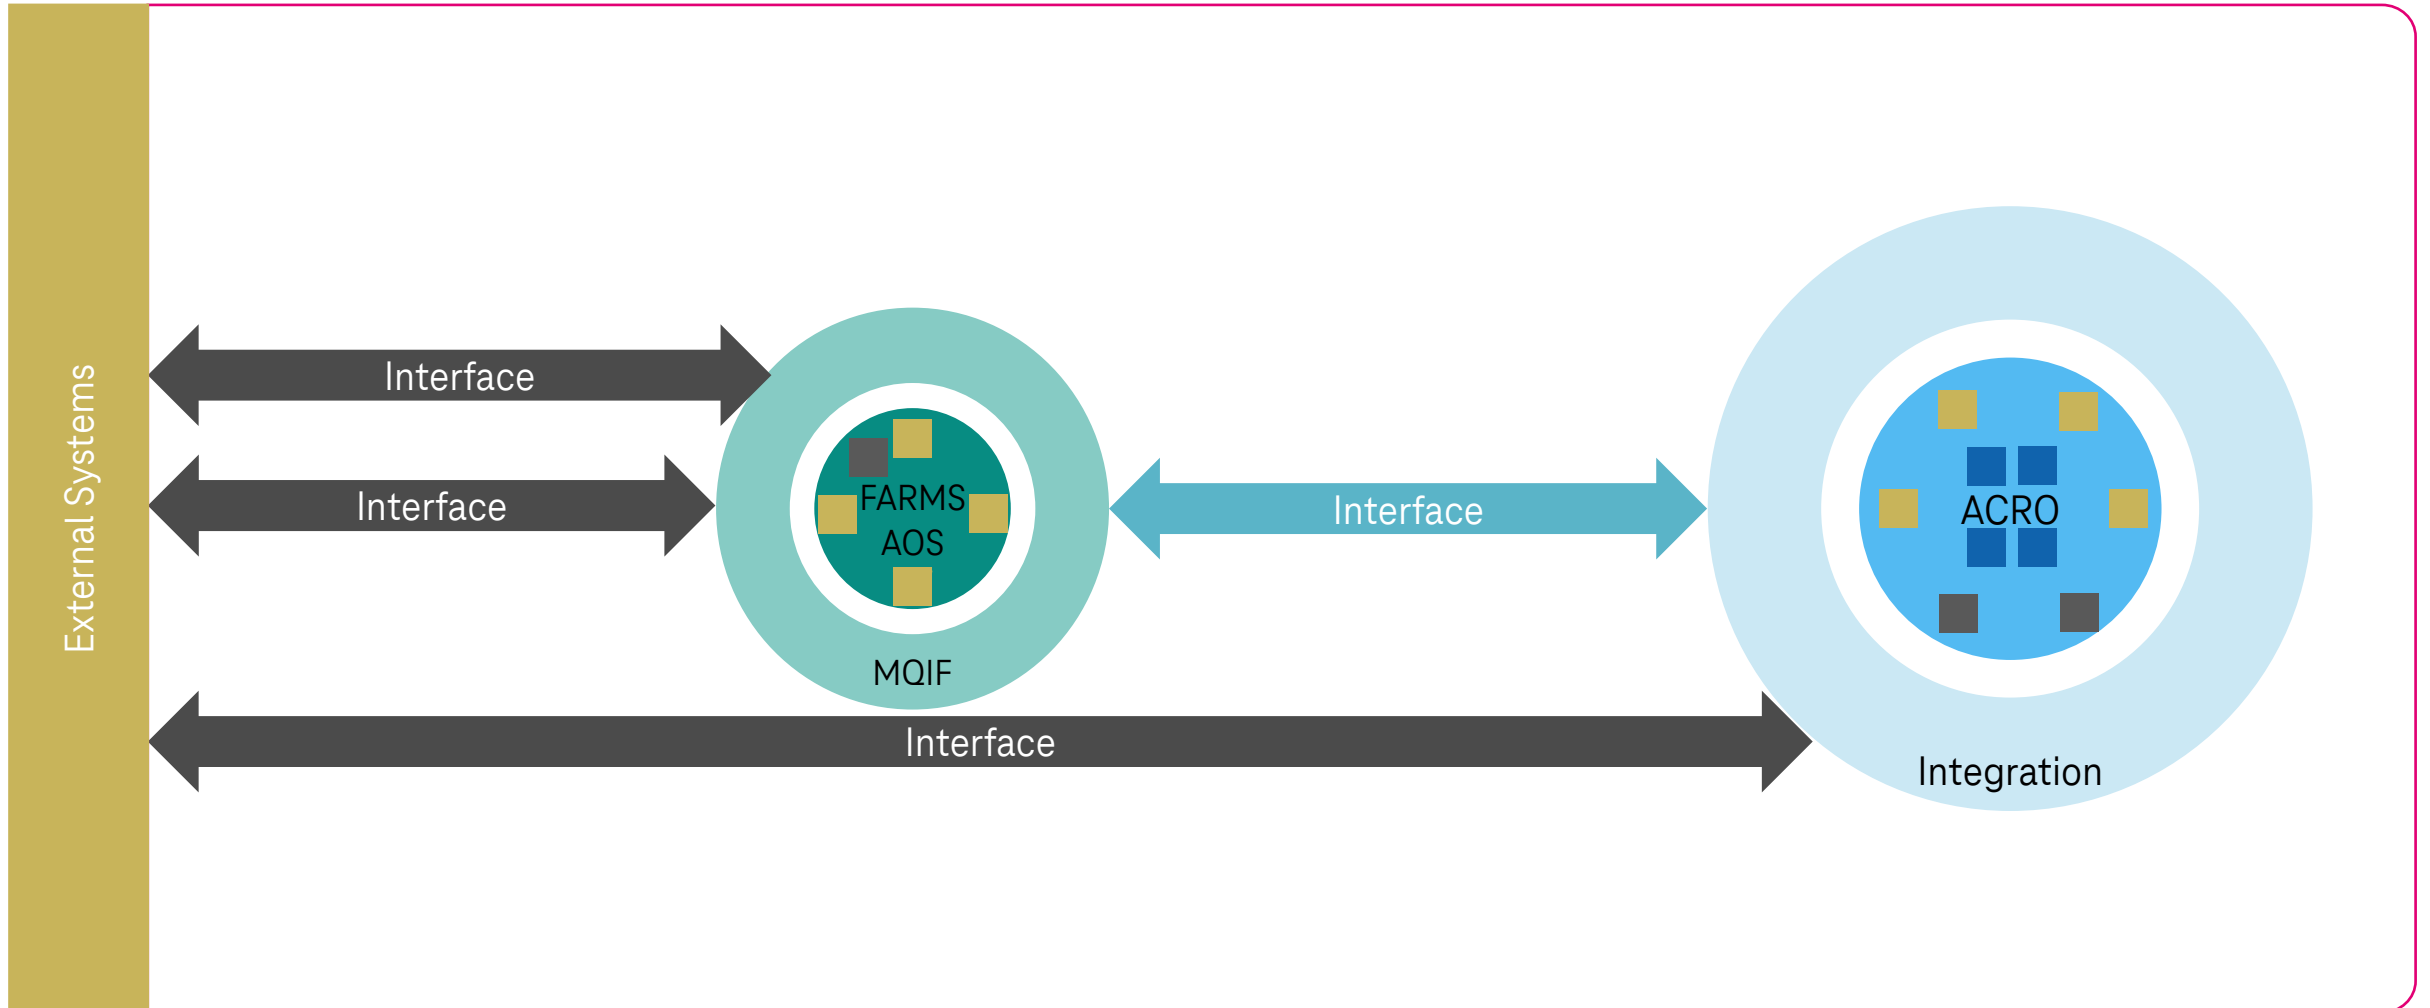

Step 1: Shadow-Run

Backlog

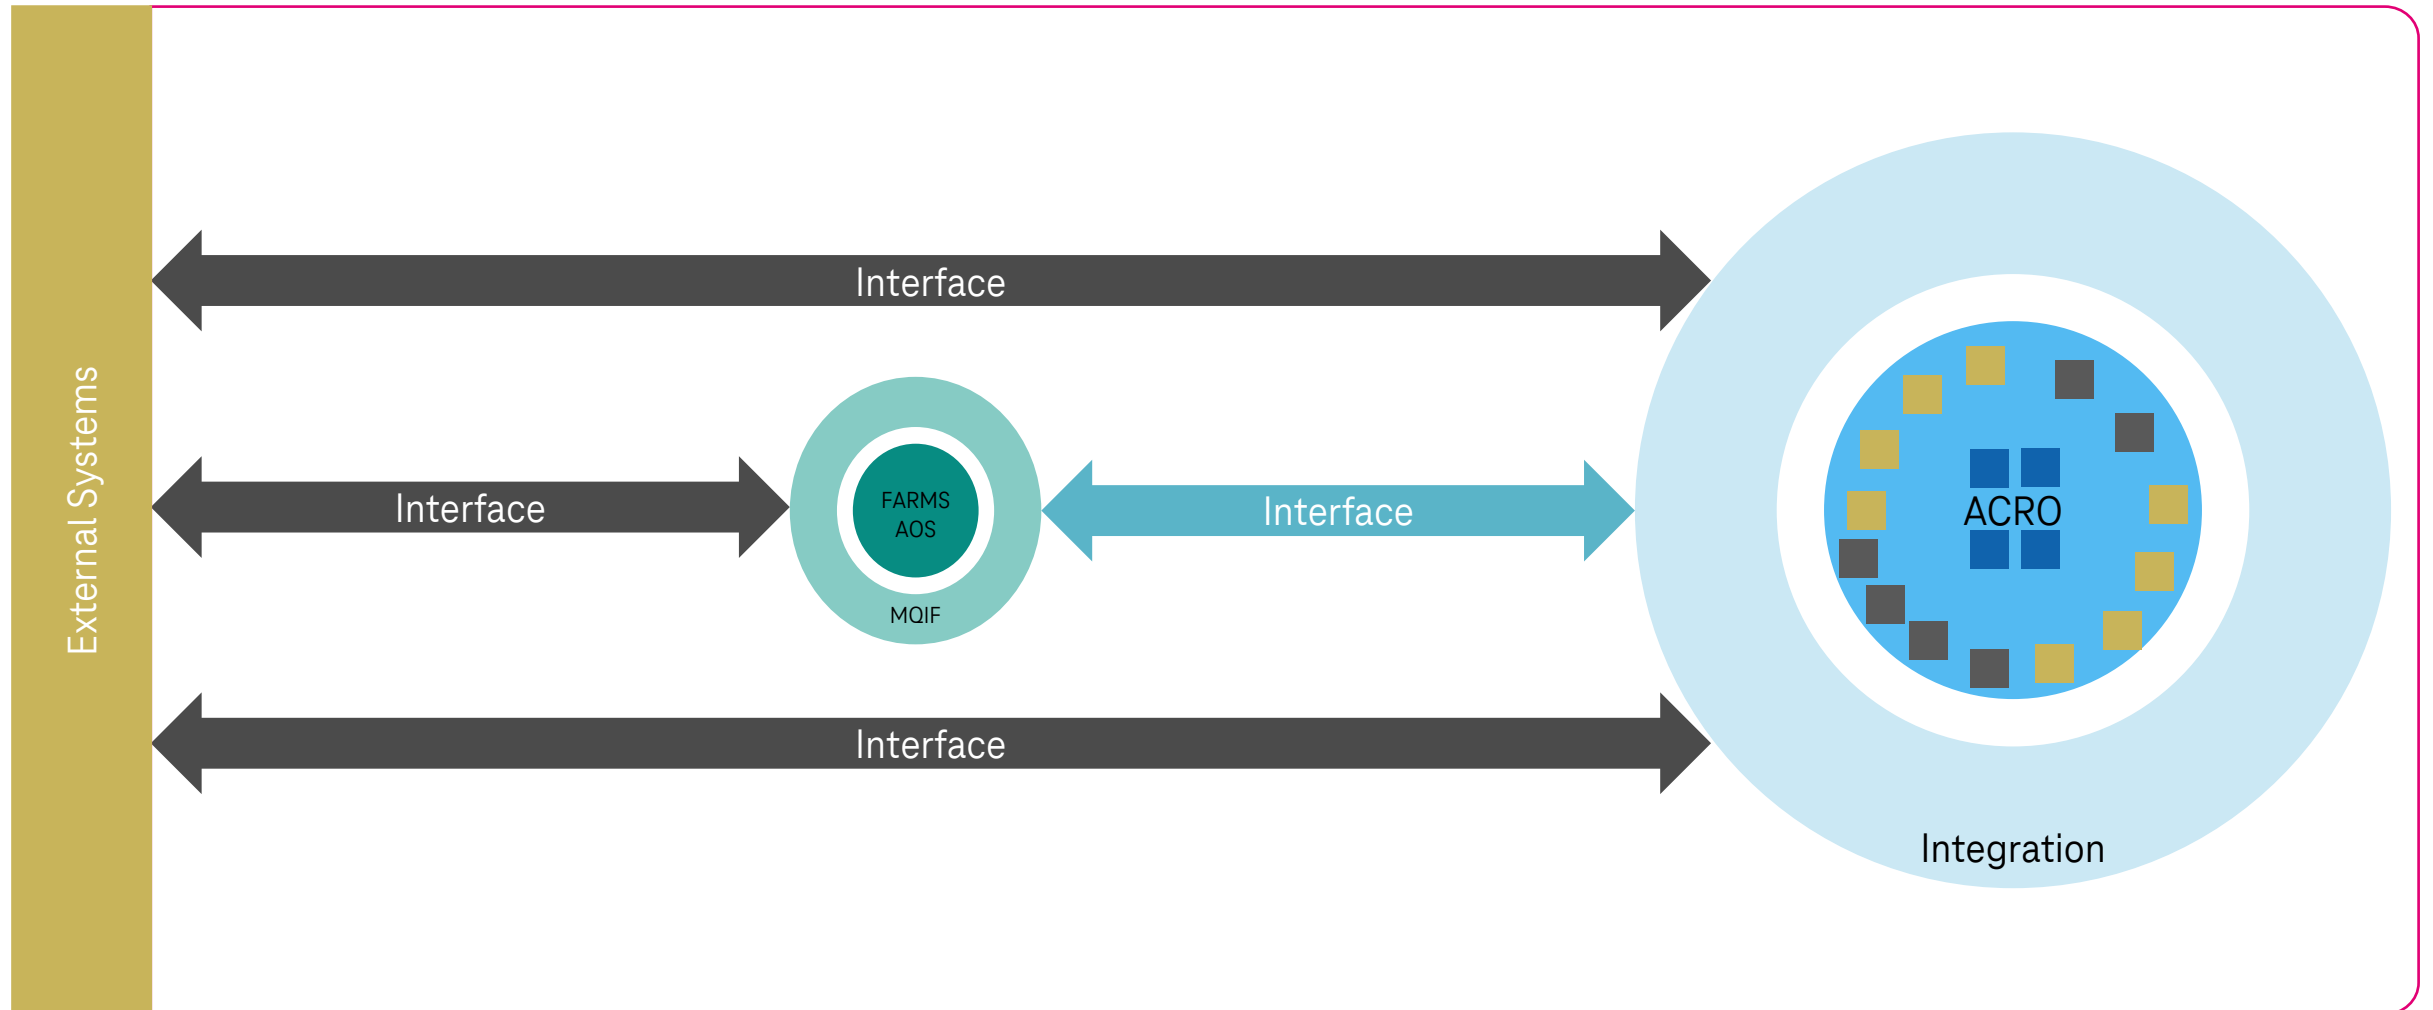

Step 2: Take Over functionality

Backlog

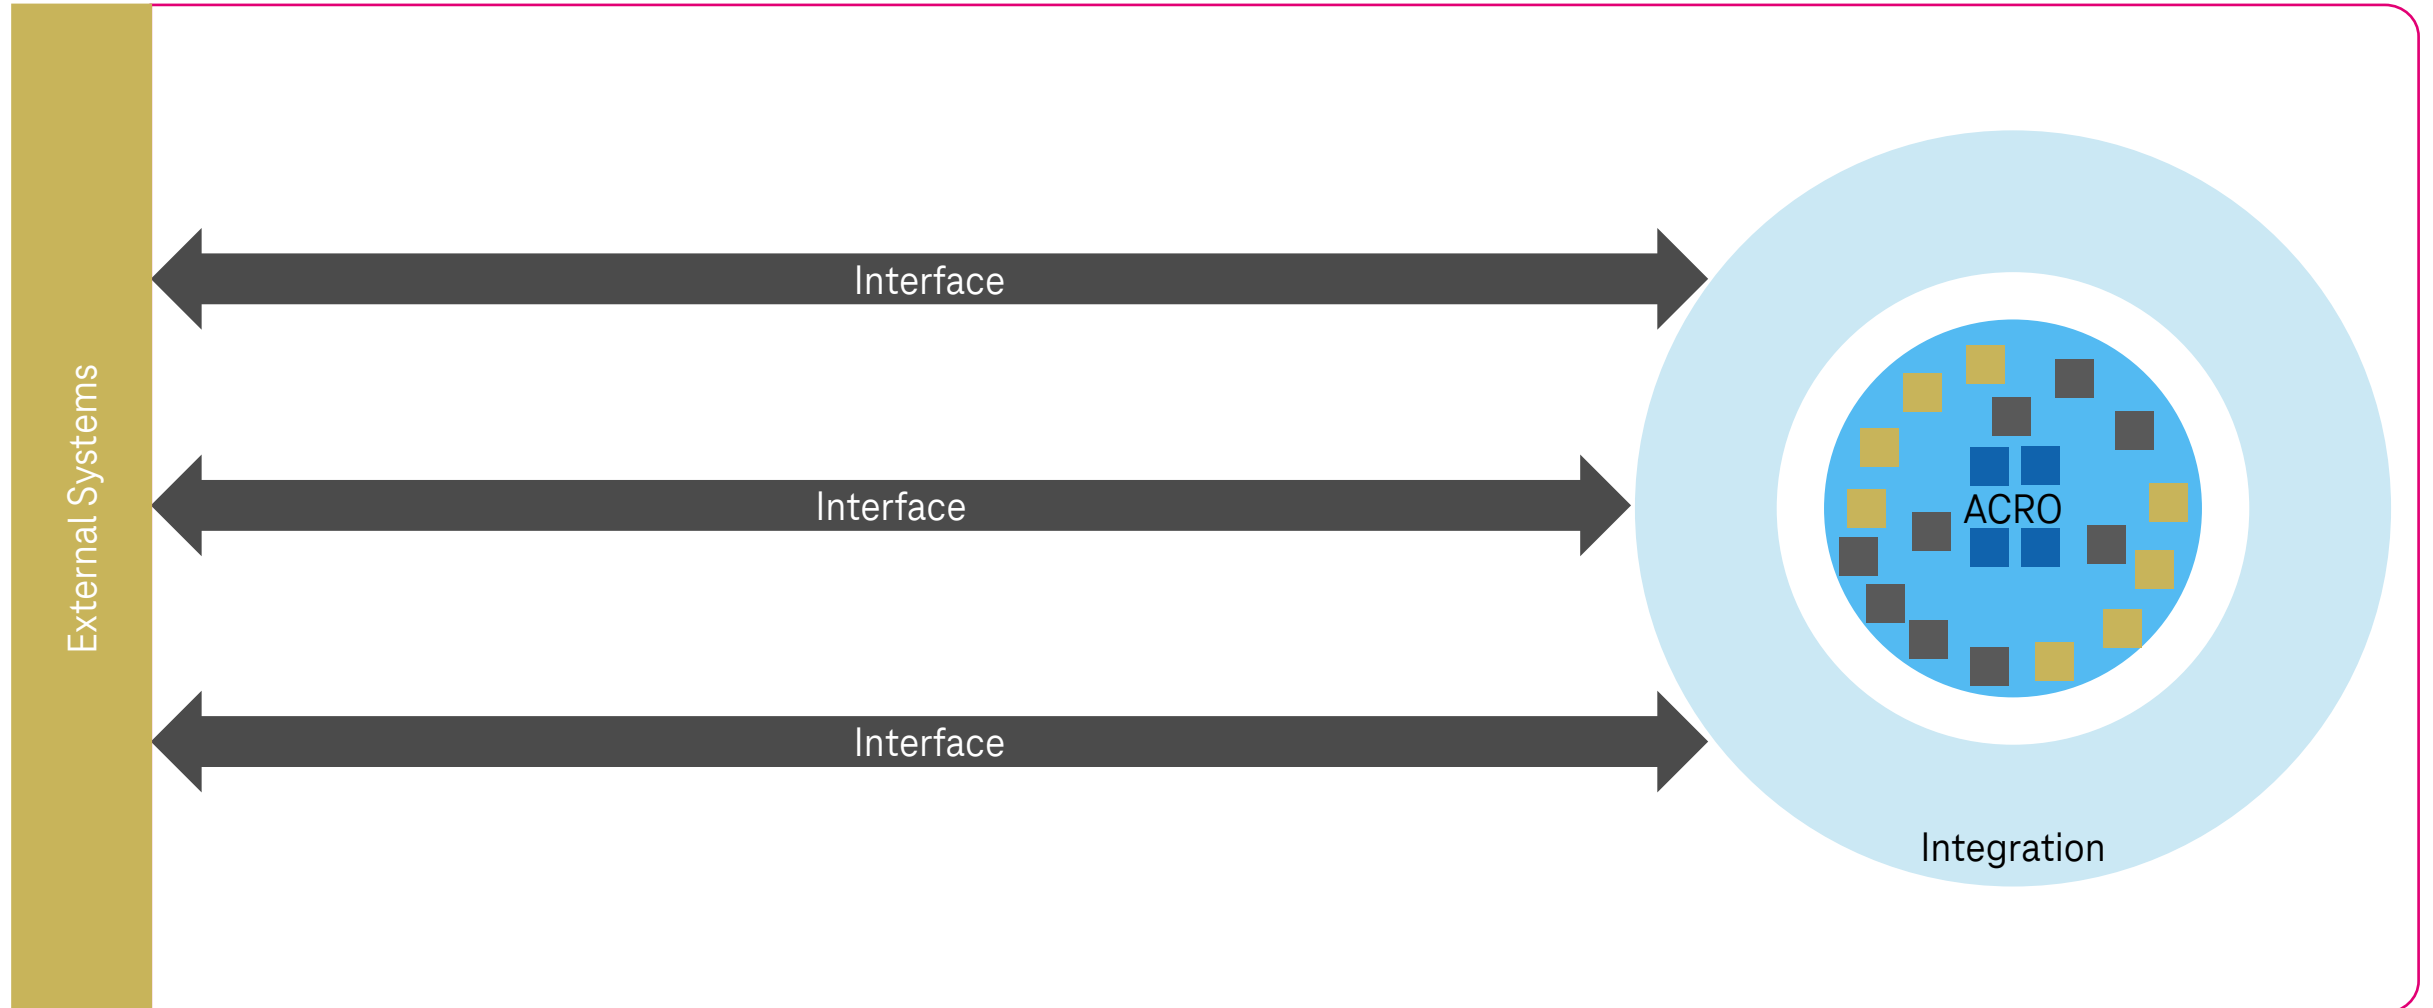

Step 3: AOS/FARMS runs interfaces

Backlog

Step 4: AOS/FARMS Retirement

Backlog

Thank you!
