

Raymond Ostelo

Raymond Ostelo is professor of Evidence Based Physiotherapy. He is one of the program directors of the Amsterdam Movement Sciences (AMS) Research Institute and he is leading the musculoskeletal research section of the department of Health Sciences (VU University). As a clinical epidemiologist and physiotherapist he combines research and education in a range of multidisciplinary projects primarily focusing on low back pain, musculoskeletal conditions, epidemiology and measurement. He has published in high profile journals (e.g. JAMA, BMJ, PAIN, Clinical Journal of Epidemiology and the Cochrane Library). He has also been involved in the development of multiple mono and multidisciplinary evidence-based clinical guidelines.
