3rd Dutch Caribbean Heart Days Curaçao

15-17 January 2026

Dear Colleagues,

It is with pleasure that we announce the **3rd Dutch Caribbean Heart Days (DCHD)** to be held **January 15 – 17, 2026** in the Ballroom of the Renaissance Hotel in Willemstad, Curaçao.

With the DCHD, a strong educational platform in (cardiovascular) radiology and cardiology is created for the Caribbean region and South-America, but also for North-America and Europe.

The meeting will feature a spectrum from basic principles towards (advanced) clinical applications and scientific innovations. As part of the main program, an evening session is organized especially for nurses and GP's. This evening can also as stand- alone session be followed by nurses and GP's.

Moreover, the program will also be appealing for residents in radiology and cardiology and technicians, pulmonologists and internal medicine MD's. Besides topical sessions covering the clinical implications of the findings, the technical aspects and imaging protocols, scientific content on cardiac imaging will be addressed. Most sessions will feature examples of actual clinical cases and how novel techniques, methods and interventions can be used to better diagnose and treat patients with a variety of diseases affecting the heart.

The congenial and collaborative atmosphere of the congress offers excellent opportunities for networking and jumpstarting multicenter collaborations and research projects within and over the continents.

Save the date and come join us in Curaçao!
