OPENROAMING™

How to connect OpenRoaming with Mac/Safari devices?

1) Access Provision Page

https://provision.connectionassist.com/wba/

Please check the box to accept terms and conditions.

Terms & Conditions

1. ☐ I accept the OpenRoaming terms & conditions of use and privacy policy.

This provisioning portal is for the WBA OpenRoaming® Live Program.

These credentials are to be used for Wireless Global Congress only and are not valid for commercial use.

Use the button below to download and install the OpenRoaming profile on compatible devices.

OpenRoaming profiles from this service are proven to work on the majority of devices (including iOS, Android, macOS and Windows 10 & 11).

If you encounter any questions, please contact PMO@wballiance.com

2. Download and install profile

4) Connect to OpenRoaming Network

Note: macOS requires Safari to install profiles (same as iOS).

2) Config and Install OpenRoaming (One-off installation only)

Or Search for: Profiles

FileVault   Turn Off...
FileVault secures the data on your disk by encrypting its content automatically.

WARNING: You will need your login password or a recovery key to access your data. A recovery key is automatically generated as part of this setup. If you forget both your password and recovery key, the data will be lost.

FileVault is turned on for the disk "Macintosh HD".
A recovery key has been set.

Lockdown Mode   Turn On...
Lockdown Mode is an extreme, optional protection that should only be used if you believe you may be personally targeted by a highly sophisticated cyberattack. Most people are never targeted by attacks of this nature.

When Mac is in Lockdown Mode, it will not function as it typically does. Applications, websites and features will be strictly limited for security, and some experiences will be completely unavailable.
