

**Andrea Evers**

Prof. Dr. Andrea W.W. Evers is professor of Health Psychology and chair of the Health-Medical-and-Neuropsychology-Unit at Leiden University, the Netherlands. Since 2020, she is also affiliated to the Technical University Delft and Erasmus University Rotterdam as Medical Delta Professor Healthy Society. After her PhD (cum laude), Andrea Evers obtained several personal grants and awards (e.g. *NWO-Veni-Vidi-Vici*, *ERC Consolidator Grant*, *NWO Stevin*) for her innovative, interdisciplinary and translational research on psychoneurobiological mechanisms and treatments for health and disease. In addition to her broad clinical experience as a registered clinical psychologist, she uniquely combines fundamental and applied science in her translational research, by focusing both on basic research on psychoneurobiology (e.g. placebo mechanisms) and translational research on screening and innovative interventions for somatic conditions (e.g. e-health tools). She was elected as a lifetime member of the *Dutch Royal Academy of Science and Arts (KNAW)* as well as the *Royal Dutch Society of Science (KHMW)*. Next to her focus on research, she is also active as clinical psychologist (BIG) and supervisory board member of the VU University Amsterdam.
