

Welcome to the Innovation Center!

T Systems Let's power
higher performance

We provide the ideal context for meaningful exchange

A man with glasses is holding a transparent board with several sticky notes. The board is partially covered by a large yellow sticky note at the top. The background is a blurred office setting.

In joint dialogue we address key questions, e.g.

- ... which chances and changes does Digitalization provide access to?
- ... which are the biggest challenges – and how can we overcome them successfully by means of digital, innovative solutions?
- ... which value-add do T-Systems and Deutsche Telekom provide for the respective line of business?

Discover Inspiration and Exchange

Open exchange

We are particularly interested in the open exchange on challenges which require innovative solutions as well as the interaction between all participants. The focus is on learning from and with each other.

Live Showcases

We set targeted impulses and create inspiring innovation experiences by means of various showcases as a trigger for reflection and transfer to clients' challenges.

Subject matter experts

We bring subject matter experts "to the table" who underline our role as "Trusted Advisor" by means of their technical expertise and their experience from customer projects.

Physical or virtual

The workshops can take place face-to-face at Innovation Center Munich as well as in our Virtual Innovation Center.

Professional moderation & facilitation

Trained moderators and facilitators prepare all workshops individually and accompany you during the event. Depending on the respective objectives, a broad range of methods can be applied, e.g. Design Thinking, Lego Serious Play® or Co-Creation.

Flexible room concept

The moveable furniture and technical equipment at Innovation Center Munich allows the room to be adapted to target group, format and group size in order to support achieving the workshop objectives in the best possible way.

Directions

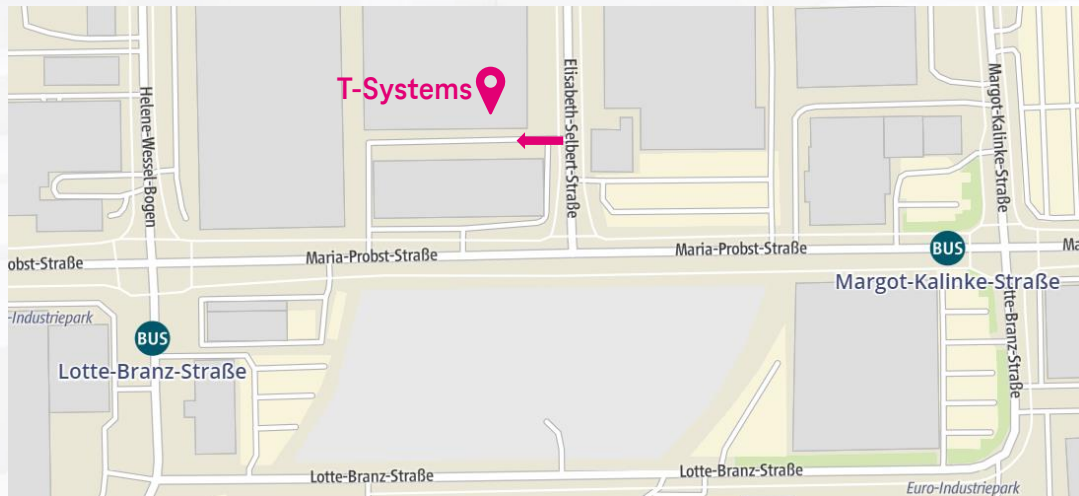

Address
