

Dirk-Jan Slebos

Prof. dr. Dirk-Jan Slebos (University Medical Center Groningen, The Netherlands), is the head of the department of pulmonary diseases, and a pulmonary physician and interventional bronchoscopist who has extensive experience in novel approaches for interventional bronchoscopy. His main clinical and research focus is on the development of innovative bronchoscopic treatments for patients with COPD. He leads the UMCG bronchoscopic intervention program, a high volume program with using a number of different techniques and devices. His work led to the worldwide roll-out of endoscopic procedures for the treatment of COPD.
