ECMO-SIMULATOREN EN MATE VAN FIDELITY

- Wat is “fidelity”?

***Fidelity** \ fə-'de-lā-tē \ adj

Etym. (n.) early 15c., “faithfulness, devotion,” from Middle French *fidélité* (15c.), from Latin *fidelitatem* (nominative *fideltas*) “faithfulness, adherence, trustiness,” from *fidelis* “faithful, true, trusty, sincere,” from *fides* “faith.” From 1530s as “faithful adherence to truth or reality;” specifically of sound reproduction from 1878.

Definition

- The degree to which the simulation replicates the real event and/or workplace; this includes physical, psychological, and environmental elements.
- The ability of the simulation to reproduce the reactions, interactions, and responses of the real-world counterpart. It is not constrained to a certain type of simulation modality, and higher levels of fidelity are not required for a simulation to be successful.
- The level of realism associated with a particular simulation activity; fidelity can involve a variety of dimensions, including (a) physical factors such as environment, equipment, and related tools; (b) psychological factors such as emotions, beliefs, and self-awareness of participants; (c) social factors such as participant and instructor motivation and goals; (d) culture of the group; and (e) degree of openness and trust, as well as participants’ modes of thinking (INACSL, 2013);

EDU-ECMO – PATIENT-CENTERED EDUCATIONAL ECMO SIMULATOR

Table 1 – Development of a real-time ECMO-simulator using the design method by Van Meurs

Training needs analysis (TNA)	Training program design (TPD)	Training media specification (TMS)	Training evaluation (TE)
Mission analysis	Specification of training activities	Simulation design	Evaluation of simulator
Task analysis	Scenario design	Hardware model creation	Evaluation of simulation
Trainee analysis	Design of instruction	Software model creation	Improvements
Training analysis			

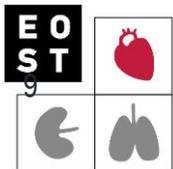

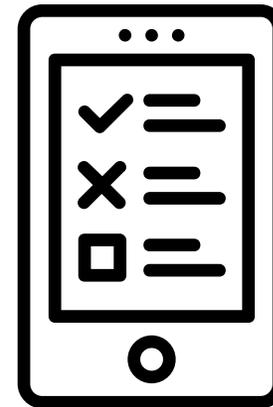

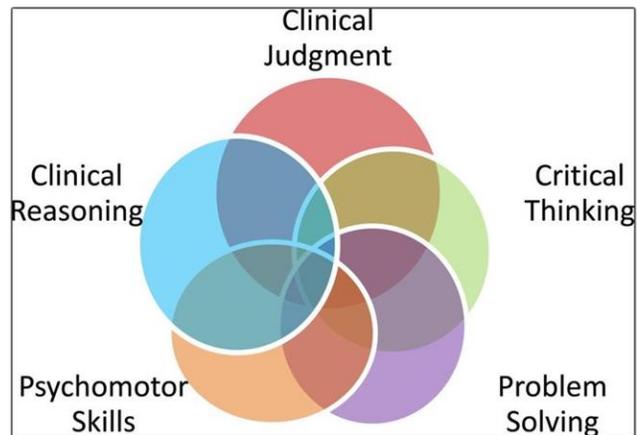

Van Meurs, Modeling and simulation in biomedical engineering, 2011

ONLINE ENQUÊTE – TRAINING NEEDS ANALYSIS

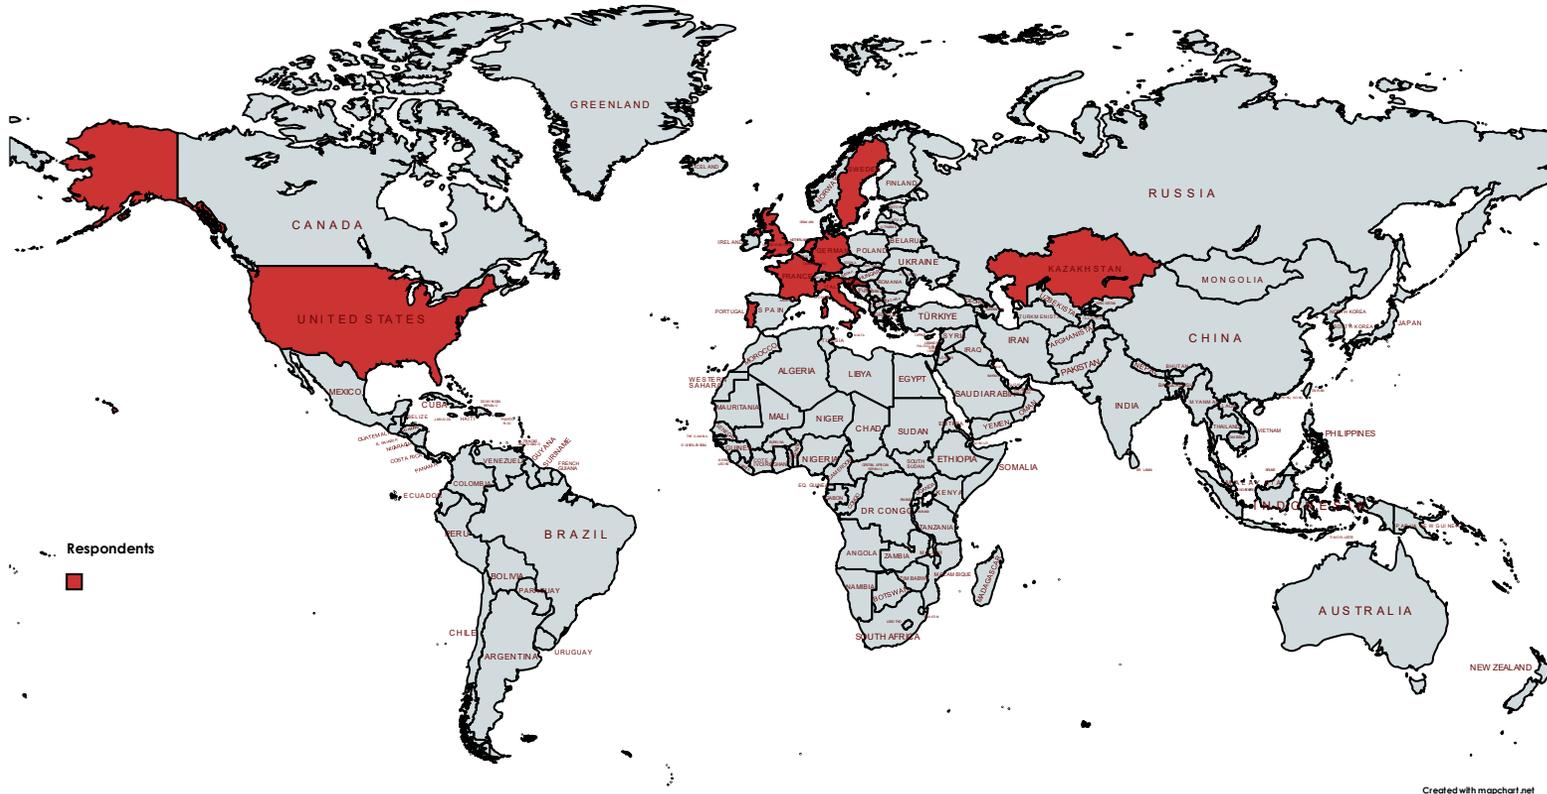

- International Nursing Association of Clinical Simulation and Learning (INACSL) Standards of Best Practice
- Experts uitgenodigd via e-mail, juli – oktober 2023
- Ethische toetsing Universiteit Twente, informed consent

INACSL standards, Clin Sim in Nurs, 2016; 12;
“online survey” door ProSymbols van the Noun Project

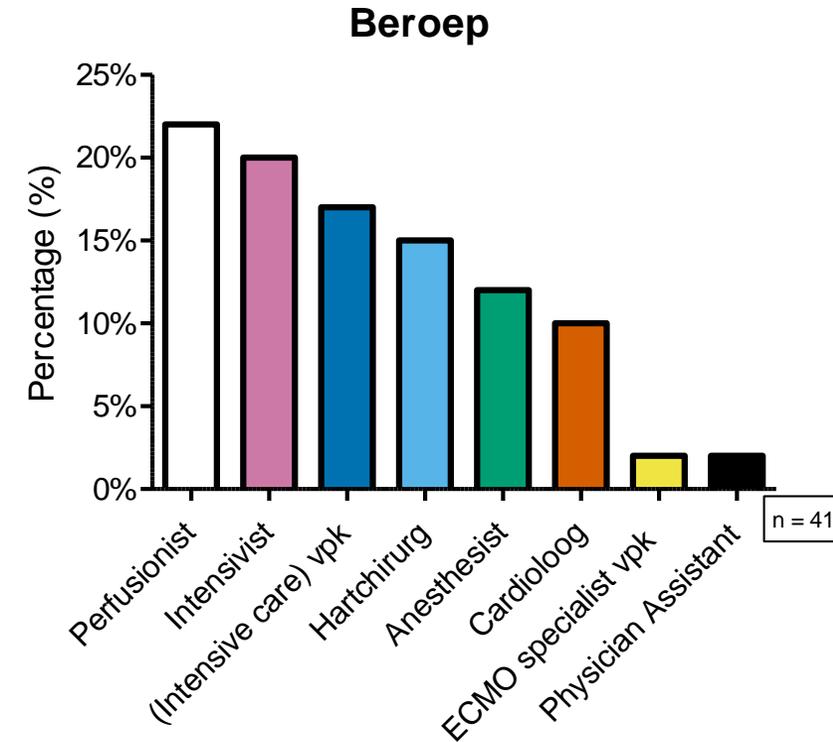

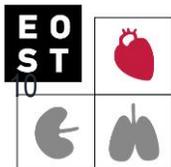

ONLINE ENQUÊTE – TRAINING NEEDS ANALYSIS

41 respondenten uit 11 landen

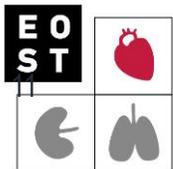

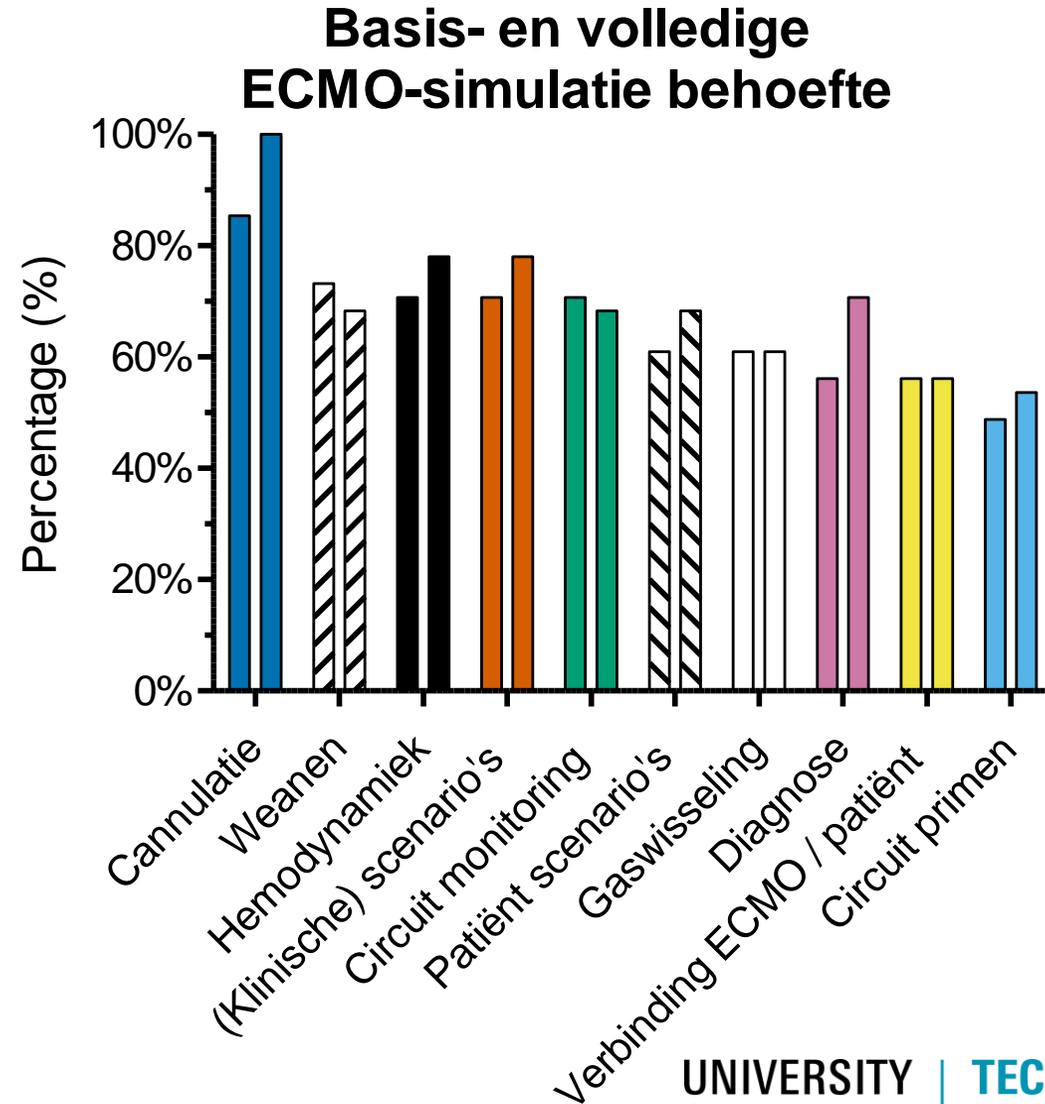

- 18% laag volume (<6 procedures / jaar)
- 18% medium volume (6 – 30 procedures / jaar)
- 42% hoog volume (>30 procedures / jaar)

ONLINE ENQUÊTE – TRAINING NEEDS ANALYSIS

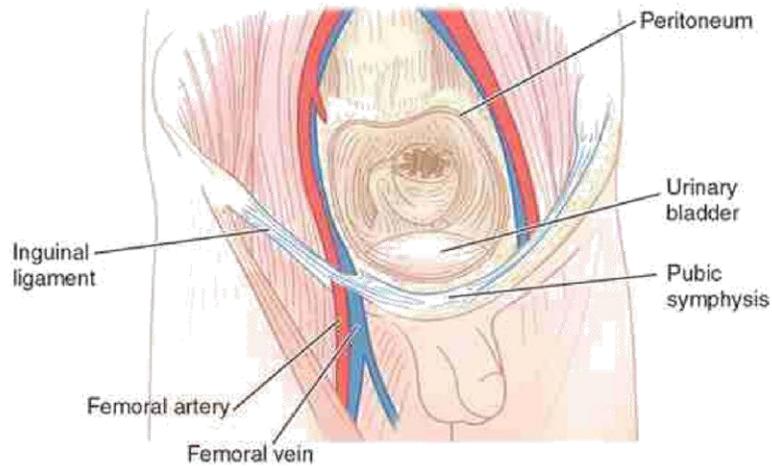

34% volgde ECMO-simulatietraining mét examen

98% wil patiënt-variantie in ECMO-simulatoren

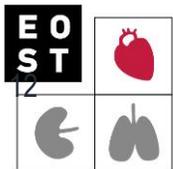

EDU ECMO – TRAINING MEDIA DESIGN

Waar praten we over?

Relevante anatomische and (patho)fysiologische structuren

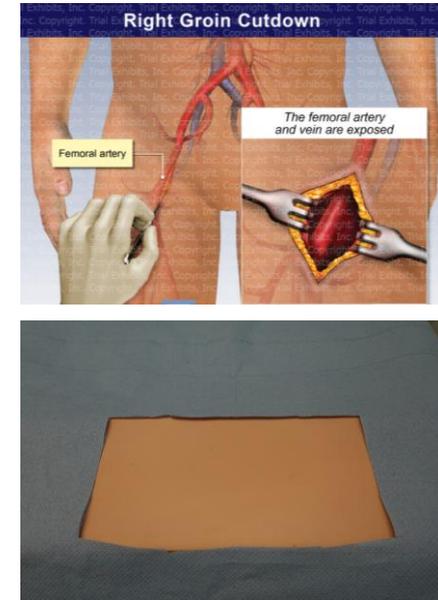

Reichmann, Emergency Medicine Procedures 2nd ed, 2013;
TrialExhibits right groin cutdown, Cl_C_0138

Synthetisch huid model

Huid, vet, spier, a./v./n. femoralis

Pilot cardio-thoracale chirurgie

Chirurgische toegang voor femorale TAVI

EDU ECMO EN IMPACT

- Nieuw model voor objectieve simulator classificatie
Inzetbaar voor selectie huidige ECMO-simulators
Toe te passen op andere simulators (bijv. off-pump hartchirurgie)
- Geüpdate simulator ontwerp strategie volgens Van Meurs
- Een training needs analysis leidt tot simulators waar behoefte aan is
Er is behoefte aan één high-fidelity ECMO simulator
En die is er nog niet!

EDU ECMO PROJECT TEAM – DANK!
