

### **Hiske van der Weide**

Hiske van der Weide is a radiation oncologist specialised in paediatric-oncology and neuro-oncology. She has been a driving force in the development of the Dutch protocols for proton therapy in neuro-oncology, and is an active member in the European Proton Therapy Network. Within the radiotherapy department and the UMCG, she had an important role in the clinical implementation of proton therapy and the organisation of care for paediatric- and neuro-oncological patients. Her PhD research focusses on the cognitive effects of radiation in adult patients with diffuse low grade gliomas.
