Wiro Niessen is Dean of the Faculty of Medical Sciences, University Groningen and Board Member of the UMCG. He is professor of AI in Medical Imaging and Health and has expertise in the development and implementation of AI in healthcare. His interests include the development and validation of quantitative biomedical image analysis methods, in linking imaging and genetic data for improved disease diagnosis and prognosis, using machine learning (AI) and image guided interventions. He supervised 60 PhD students in these fields. He is fellow and was president of the MICCAI Society. From 2019-2023 he was CTO of Health-RI, which aims to develop a national health data infrastructure for reuse of data for research and innovation. In 2015 he received the Simon Stevin award, the largest prize in the Netherlands in Applied Sciences. In 2017 he was elected to the Royal Netherlands Academy of Arts and Sciences.
