Abstract: The coming decades are expected to be extremely challenging for organizations. On the one hand, there are the United Nations Sustainable Development goals to end poverty, protect the planet and improve the lives and prospects of everyone. On the other hand, organizations are expected to have to deal with an increasing number of megatrends and disruptors, many of which are already having an impact. To help organizations in their priority setting and decision-making so they can contribute to the development goals (specifically Goal 8: decent work and economic growth)

Table A1. Overview of the Literature Review Results.

Silicon Valley is in de ban van een nieuwe visie op de digitale toekomst: de **metaverse**. Wat is dat?

Opvolger van het internet Facebook kondigde deze zomer aan te veranderen in een 'metaversebedrijf'. Want mensen zijn niet gemaakt „om via kleine lichtgevende rechthoeken met elkaar te communiceren”, aldus oprichter Mark Zuckerberg. Maar wat is die metaverse nu eigenlijk? En zitten consumenten daar echt op te wachten?

1. Implantaten hand
2. Klimaatcrisis
3. Kunstmatige intelligentie
4. Robots
5. Metaverse
6. Implantaten brein
