

### Summer school

# "One health approaches to study climate sensitive infectious diseases" Preliminary program

Monday 12 August 2024		
Introduction to climate change and infectious diseases		
09.00 – 12.30	Climate change scenarios in the Netherlands	Prof. dr. Pier Siebesma TU Delft/KNMI
	Setting the scene: Climate sensitive infectious diseases in a changing world	Prof. dr. Marion Koopmans Erasmus MC - NL
	Climate change-driven infectious disease dynamics – a modelling based-approach	Prof. dr. Joacim Rocklöv University of Heidelberg - GER
	One health approaches to study mosquito-borne viruses	Dr. Reina Sikkema Erasmus MC - NL
12.30 – 13.30	Lunch	
13.30 – 17.30	Outbreak game	All
10.00 11.00	Introduction to Capstone projects	All
16.30 – 17.30	Tour through Erasmus MC	All
17.30 – 19.00	Drinks – rooftop garden Erasmus MC	All
Tuesday 13 August 2024		
	Tuesday 13 August 2024	
Clim	Tuesday 13 August 2024 nate sensitive infectious diseases: One Health case studies	<b>3</b>
Clim		Dr. Lineke Begeman Erasmus MC - NL
	nate sensitive infectious diseases: One Health case studies  Zoonoses in the night (ZITN)  Pandemic prevention and early detection of bat-transmitted	Dr. Lineke Begeman
09.00 – 12.30	Zoonoses in the night (ZITN) Pandemic prevention and early detection of bat-transmitted viruses in balance with the protection of bats  One Health Pact:	Dr. Lineke Begeman Erasmus MC - NL Dr. Reina Sikkema
	Zoonoses in the night (ZITN) Pandemic prevention and early detection of bat-transmitted viruses in balance with the protection of bats  One Health Pact: Predicting Arboviruses Climate Tipping Points  Decision- support tools to build climate resilience against	Dr. Lineke Begeman Erasmus MC - NL  Dr. Reina Sikkema Erasmus MC - NL  Prof. Dr. Joacim Rocklöv University of
	Zoonoses in the night (ZITN) Pandemic prevention and early detection of bat-transmitted viruses in balance with the protection of bats  One Health Pact: Predicting Arboviruses Climate Tipping Points  Decision- support tools to build climate resilience against emerging infectious diseases in Europe  Using genomics to study outbreaks on the human-animal	Dr. Lineke Begeman Erasmus MC - NL  Dr. Reina Sikkema Erasmus MC - NL  Prof. Dr. Joacim Rocklöv University of Heidelberg- GER  Dr. Bas Oude Munnink
09.00 – 12.30	Zoonoses in the night (ZITN) Pandemic prevention and early detection of bat-transmitted viruses in balance with the protection of bats  One Health Pact: Predicting Arboviruses Climate Tipping Points  Decision- support tools to build climate resilience against emerging infectious diseases in Europe  Using genomics to study outbreaks on the human-animal interface	Dr. Lineke Begeman Erasmus MC - NL  Dr. Reina Sikkema Erasmus MC - NL  Prof. Dr. Joacim Rocklöv University of Heidelberg- GER  Dr. Bas Oude Munnink
09.00 – 12.30	Zoonoses in the night (ZITN) Pandemic prevention and early detection of bat-transmitted viruses in balance with the protection of bats  One Health Pact: Predicting Arboviruses Climate Tipping Points  Decision- support tools to build climate resilience against emerging infectious diseases in Europe  Using genomics to study outbreaks on the human-animal interface  Lunch	Dr. Lineke Begeman Erasmus MC - NL  Dr. Reina Sikkema Erasmus MC - NL  Prof. Dr. Joacim Rocklöv University of Heidelberg- GER  Dr. Bas Oude Munnink

#### **Summer school**

## "One health approaches to study climate sensitive infectious diseases" Preliminary program

#### Wednesday 14 August 2024 Surveillance of vectors and hosts Field trip: Surveillance of vectors and hosts - traditional 07.00 - 11.45ΑII and innovative approaches 11.45 - 12.30Lunch - Erasmus MC park Field data analysis Workshop: combined eDNA and virus genetics Workshop: working with bioacoustics data Workshop: Mosquito differentiation and IHC 12.30 - 15.00ΑII Workshop: Added value and implementation of serological approaches ΑII 15.30 - 17.30Group work: Capstone project Thursday 15 August 2024 Adapting to the effects of climate change Field activity: walk through Rotterdam to visit NbS and 09.00 - 12.30All assess effects on mosquitos 12.30 - 13.30Lunch - take away lunch Maarten Schrama Unknown effects of salinization on mosquito populations and University of Leiden-NL vector competence 13.30 - 15.00Vector-borne diseases as unintended consequences: Marina Treskova introduction to methods to study design for evaluation of University of Heidelberg-Nature based Solutions (NbS) **GER** Workshop: The process of co-creation in urban climate Floris Boogaard 15.00 - 16.00adaptation measures **Deltares** 16.00 - 17.00Group work: Capstone project All 18.00 - 20.30River cruise with captain's dinner Friday 16 August 2024 Thinking ahead: data collection for modelling Added value and challenges of combining field data from Quirine ten Bosch WUR-NL different sources in arbovirus modelling 09.00 - 12.30Marina Treskova Do's and don'ts in data collection for modelling purposes University of Heidelberg-**GER** challenges of structured data collection when working with Henk van der Jeugd volunteer citizen scientists - disease surveillance in wild NIOO-KNAW birds 12.30 - 13.30Lunch ΑII 13.30 - 16.00Presentations Capstone project

16.00 - 17.00

Closure of summercourse
