T-Systems Airport User Days & Conference |
September, 7-8 2023

T Systems

Let's power
higher performance

**This presentation contains confidential information and is distributed on the understanding that it will not be used, in whole or in part, in any form or made available to any third party, except for participants of the User Conference and employees of the respective airport companies.*

Agenda

01 PDS Project (T-Systems)

Challenges, Project Execution, Success Factors, Learnings

02 Airport Benefits for BER (FBB)

03 System Demonstration PDS@BER (DFS)

04 Questions / Discussion (all)

01

PDS Project (T-Systems)

T Systems

Let's power
higher performance

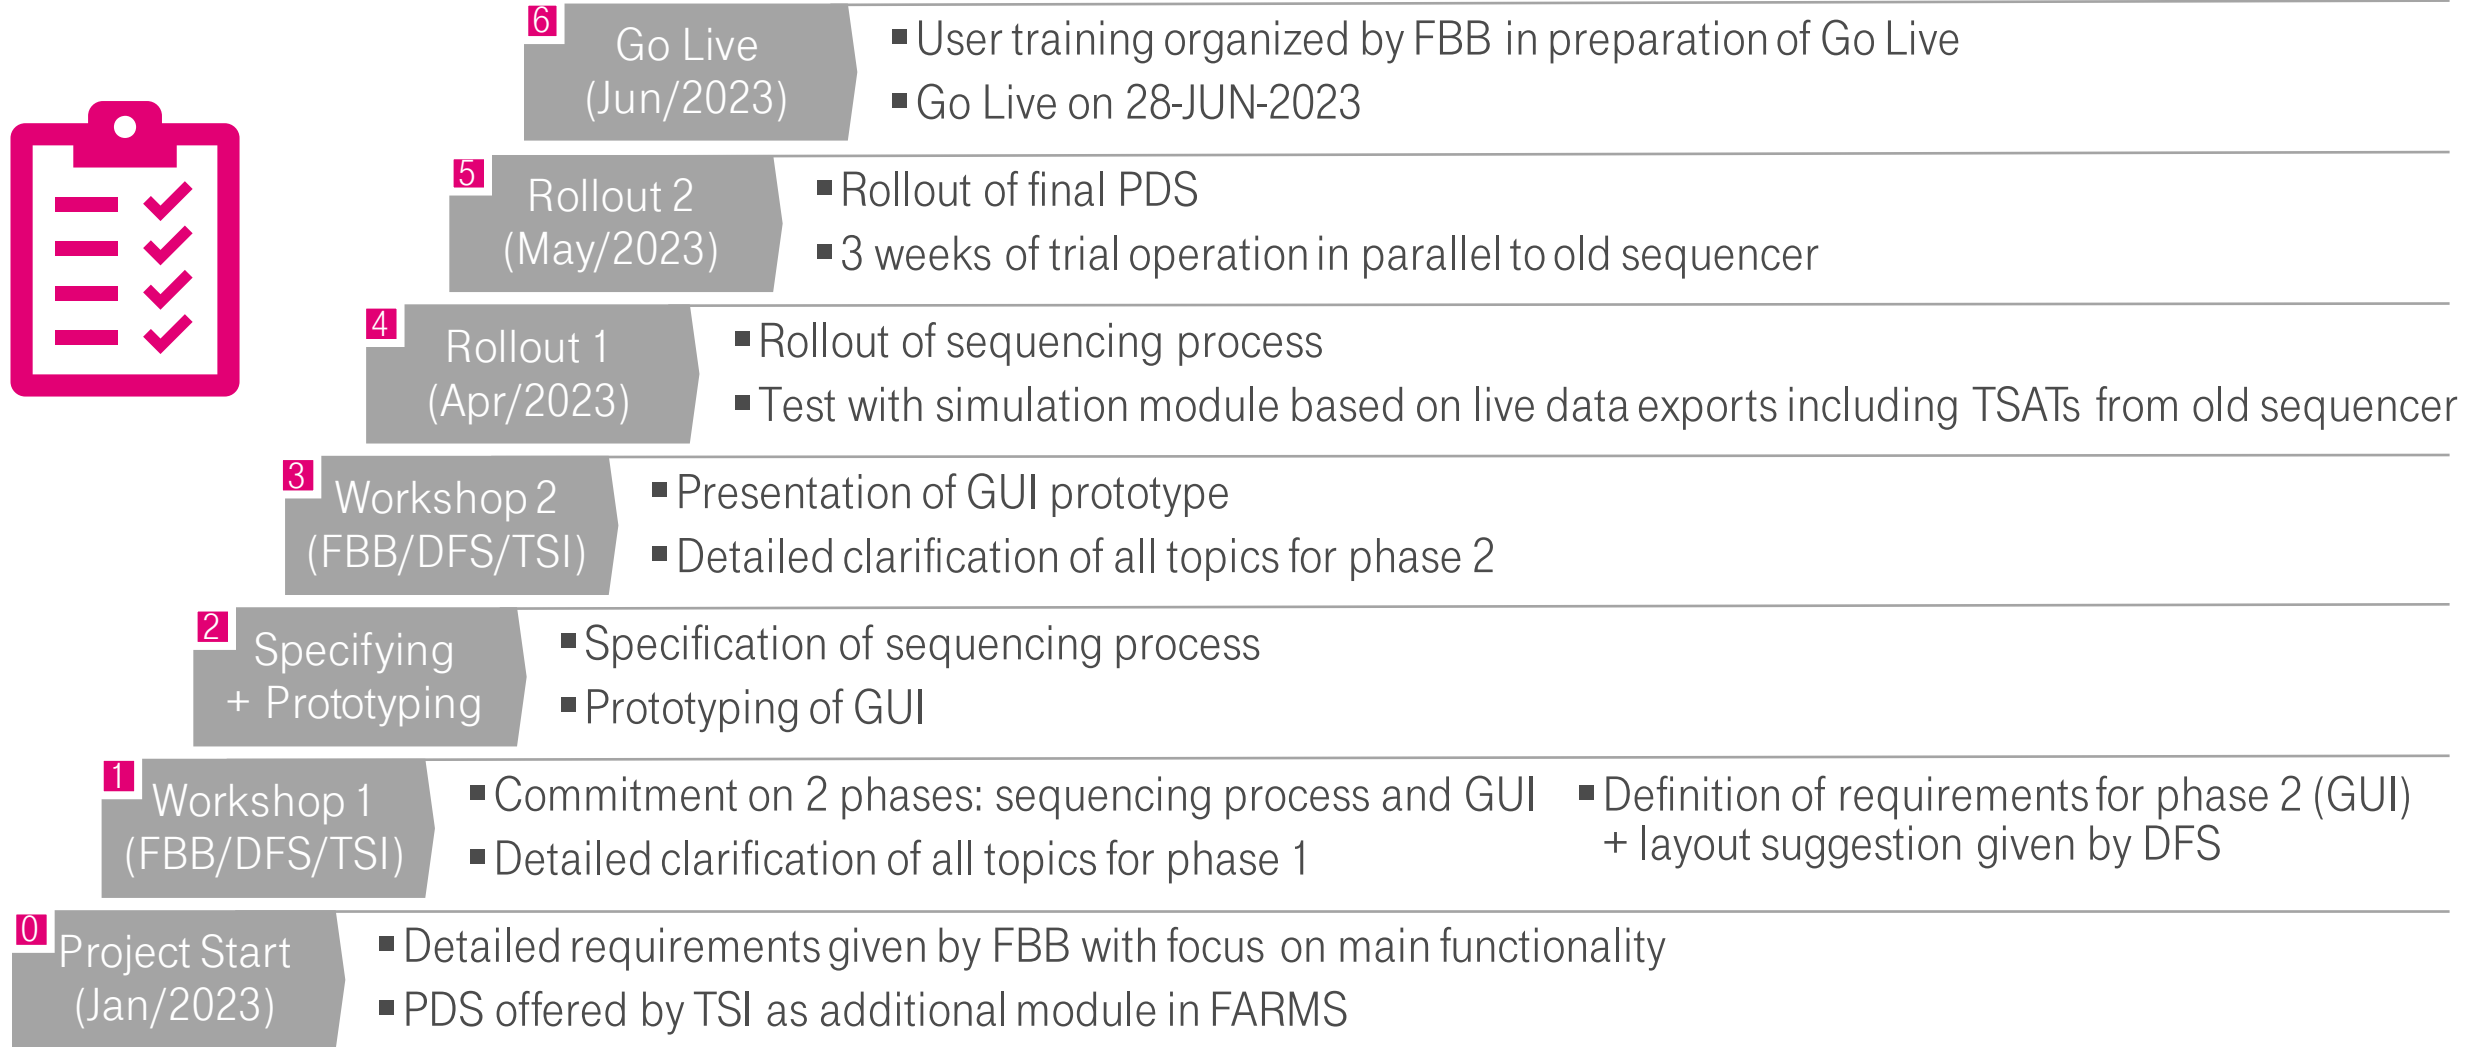

PDS Project Challenges

- New system development in new area for TSI
- Project under special observation by management
- Additional, important stakeholder: DFS
- Ambitious time schedule (6 months!)

PDS Project

Project Execution

PDS Project

Success Factors & Learnings

- Very good team spirit between FBB, DFS und TSI!
- Work on a detailed specification was essential
- Active contribution of DFS especially regarding GUI layout
- Short, effective cycles of testing and according problem solving
- Efficient planning and execution of user trainings by FBB
- Classic waterfall approach worked very well for this specific project

02

Airport Benefits for BER (FBB)

T Systems

Let's power
higher performance

PDS Project

Background and project goal

- old PDS has been terminated by the former system provider
- therefore an unplanned tender was launched
- all involved stakeholders must be informed und trained

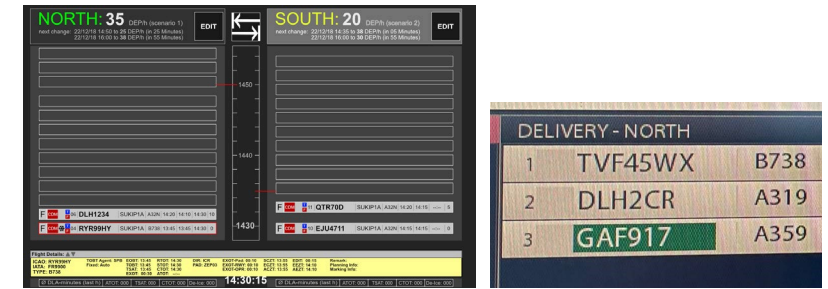

project goal:

- introduction of a new PDS to execute the A-CDM process

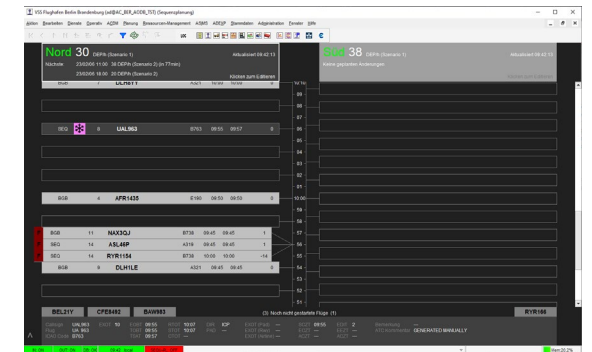

PDS Project

PDS benefits for the location EDDB

- requirements were well described and left no room for interpretations >> detailed specifications were essential
- good collaboration and inputs, especially mockups
- result is tailored to the EDDB needs

- we personally trained 30 DFS colleagues
- all backlog and specification requirements were implemented
- Go Live on 28-JUN-2023

03

System Demonstration PDS@BER (DFS)

Live Demo

FARMS/PDS BER

T Systems

Let's power
higher performance
