

Thursday June 9, 14:00-15:15h

	Methods: Prediction & IPD meta-analyses	Cancer	COVID-19	Pharmacoepidemiology
Room	Auditorium	Waalbrug A	Waalbrug B	Waalbrug C
Chairs	Femke Atsma & Sander Groen in 't Woud	Jos van Dijck & Marissa van Maaren	Michiel de Boer & Iris Walraven	Charlotte Bekker & Marleen van Gelder
14:00	Low inter-rater reliability of the Prediction model Risk Of Bias ASsessment Tool (PROBAST) was difficult to improve (O1) <i>Junfeng Wang</i>	Occurrence of malignancies other than breast- and ovarian cancer in female BRCA1/2 mutation carriers (O6) <i>Anniek Stuursma*</i>	Effectiveness of contact tracing apps for SARS-CoV-2: a systematic review of evidence (O11) <i>Kevin Jenniskens</i>	Antibiotic exposure during pregnancy and risk of wheezing in the offspring: a prospective cohort study (O16) <i>Michelle Clevis**</i>
14:15	Prediction of cancer-related fatigue using multiple machine learning models (O2) <i>Lian Beenhakker</i>	Longitudinal associations of adherence to the World Cancer Research Fund / American Institute for Cancer Research lifestyle recommendations with quality of life and symptoms in colorectal cancer survivors (O7) <i>Marlou Floor Kenkhuis</i>	Impact of the interruption of the Dutch national breast cancer screening program due to COVID-19: a modelling study (O12) <i>Keris Poelhekken</i>	The utilisation of low-dose rivaroxaban in patients with atherosclerotic cardiovascular disease in the United Kingdom and The Netherlands (O17) <i>Nicolas Hunt</i>
14:30	Quantitative prediction error analysis to investigate predictive performance under predictor measurement heterogeneity at model implementation (O3) <i>Kim Luijken</i>	Suboptimal guideline adherence to recommended use of neoadjuvant chemotherapy in patients with non-metastatic muscle-invasive bladder cancer (O8) <i>Lisa van Hoogstraten</i>	Impact of COVID-19 on arthroplasty surgeries in 2020 in The Netherlands (O13) <i>Maaïke Gademan</i>	Sex differences in the primary prevention of cardiovascular diseases in a Dutch primary care setting (O18) <i>Pauline Kiss</i>
14:45	Imputation of incomplete variables in an individual participant data meta-analysis: Relaxing the need for untestable assumptions (O4) <i>Johanna Munoz</i>	Prediction of histological grade of invasive breast cancer using radiomics-based features on screening mammograms (O9) <i>Jim Peters</i>	Why do strongly urbanised areas have a higher incidence of hospitalisation with SARS-CoV-2 infection? Generating hypotheses from an ecological study using surveillance data (O14) <i>Bronke Boudewijns</i>	Representativeness of the PHARMO Electronic Health Records (EHRs) from primary care (O19) <i>Jetty Overbeek</i>
15:00	Additive interaction in two-stage individual participant data meta-analysis: a proposed method and example from the PSY-CA consortium (O5) <i>Maartje Basten</i>	Adherence to the WCRF/AICR cancer prevention recommendations and risk of recurrence in non-muscle invasive bladder cancer (O10) <i>Moniek van Zutphen</i>	Early detection of deterioration in COVID-19 patients using continuous measurements (O15) <i>Guido Peters</i>	Sex differences in treatment patterns for non-metastatic muscle-invasive bladder cancer – an analysis of 3,484 patients of the Netherlands Cancer Registry (O20) <i>Anke Richters</i>

*Nominated for the VvE Oral Presentation Award

**Nominated for the VvE Student Award
